DETAILED ACTION

1. This communication is responsive to amended application filed on 06/05/2007.
2. Claims 3-4, 8-9, 11-12, and 16-17 are pending.
3. Claim 3, 4, 8-9, 11-12, and 16-17 are amended.
4. Claim 18 is canceled currently.
5. Claims 1, 2, 5-7, 10, and 13-15 are canceled previously.

Response to Arguments

6. Response to Specification Objection: Examiner withdraws the objection of specification in view of the cancellation of claim 18.
7. Response to 112(1) rejection: Examiner withdraws the rejection in view of the cancellation of claim 18.
8. Response to 101 rejection: Examiner withdraws the rejection in view of the cancellation of claim 18.
9. Response to 103(a) rejection: Applicant's arguments with respect to the rejection(s) of claim(s) under 103(a) have been fully considered and are persuasive.

The prior art of reference fails to disclose singly or in combination with another the limitation of:

receiving a selection which is made by a user and is indicative of a combination of one of the plurality of selective variables and one of the plurality of selective mechanism elements, to generate a table that represents a correspondence between the variables and the mechanism elements based on the selection, wherein the one of the plurality of selective variables in the combination is selected by selecting a class of predefined hybrid model to which the selective variables belong, and selecting a member variable in the class;

In particular, the prior art of record does not explicitly disclose the specific sequence of method steps and/or combination of system elements of the claimed invention.

Therefore, the rejection has been withdrawn.

Specification

10. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

11. Claims 3-4, 8-9, 11-12, and 16-17 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed invention of claims 9, and 17 would impermissibly cover every substantial practical application of, and thereby preempt all use of, an abstract idea, and therefore the claimed invention is non-statutory.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
